Education

SoftUni
Java Development
2022 – 2024

Professional Tourism School
2011 – 2015

Technical Skills

- BACKEND**
- Java
 - Spring Boot / Spring Data
 - Hibernate / JPA
 - REST API Design
 - JUnit / Mockito
- FRONTEND**
- Angular
 - TypeScript
 - RxJS
 - Angular Material
 - HTML / CSS
- DATABASES**
- PostgreSQL
 - MySQL
 - MongoDB
 - Flyway Migrations
- INFRASTRUCTURE**
- Docker / Docker Compose
 - AWS S3
 - Cloudflare CDN
 - Nginx
 - Linux / Ubuntu
 - Git
 - Maven / Gradle

Software Developer

Full-stack Java developer with hands-on experience building and deploying production applications. Professionally working on enterprise compliance software while maintaining Collectra, a personal full-stack project built with Spring Boot and Angular.

Experience

Java Developer Nov 2024 – Present
DXC Technology – Bulgaria

- Developing and maintaining enterprise software for material compliance, risk management, and supply chain transparency, serving major global manufacturers including Volvo, Airbus, and Bosch.
- Working within a large cross-functional team of ~60 engineers on a mission-critical platform that ensures regulatory compliance across complex international supply chains.
- Contributing to a mature Java codebase, collaborating through code reviews, and following established enterprise development practices.

Full-Stack Developer Sep 2022 – Present
Collectra – Personal Project | collectra.site

- Spring Boot · Angular · PostgreSQL · AWS S3 · Docker · Cloudflare
- Designed and built a full-stack collection management platform from scratch — backend REST API, Angular SPA, PostgreSQL schema, Docker Compose deployment, and Cloudflare CDN configuration.
 - Implemented JWT authentication with token rotation, Google Sign-In integration, and GDPR-compliant account management including data export and full account deletion with S3 cleanup.
 - Built a dynamic EAV (Entity-Attribute-Value) system for custom fields per category, photo uploads with S3 storage and thumbnail generation, and a collection sharing feature with public snapshot links.
 - Managed the full infrastructure: Hetzner VPS, Docker Compose, Nginx reverse proxy, Flyway migrations, automated backups, Cloudflare WAF rules, and rate limiting with Bucket4j.

Frontend Developer 2025 – Present
OraKit – Personal Project | orakit.dev

- Angular · TypeScript · Web Components · Cloudflare · Nginx
- Built a free, browser-based toolkit for Oracle developers: an Execution Plan Visualizer that parses DBMS_XPLAN output into an interactive tree with a 7-rule analysis engine, and a PL/SQL Dependency Viewer that parses package bodies and renders force-directed graphs of internal calls, table references, and cross-package dependencies.
 - Runs 100% client-side with no data transmission — safe for production artifacts. Built with Angular Elements (Web Components) for independent, SEO-optimized tool pages. Hosted on Hetzner with Cloudflare Full Strict SSL.

Certifications

- Spring Advanced – SoftUni
- Spring Data – SoftUni
- MySQL – SoftUni
- Java OOP – SoftUni
- JavaScript – SoftUni
- HTML & CSS – SoftUni
